Most Popular Questions, easily answered!

- Q) If installing a new system, what should I know?
 A) Most intruders make entry through a door, so it is vital that you sensor every door entering your living space.
- Q) Can I have a Motion Detector if I have pets?
 A) Yes, today's technology offers 80# pet immunity!
- Q) What does a Glass Break Sensor do?
 A) It detects the sound and vibration of breaking glass and has a 30 foot range. In some cases installing glass breaks can be more cost effective than individual window sensors because of their range.
- Q) What is a Takeover Switch and how many do I need?
 A) A Takeover Switch is only needed if upgrading an existing system. It allows us to "takeover" your system and use most of your existing peripheral devices. You would need one switch per every 8 Hardwired Zones. (Occasionally special circumstances apply depending on manufacturer of current system)
- Q) What devices will a Takeover switch NOT takeover?
 A) Life-Safety devices- Smoke and Heat Detectors- These can be replaced for two points each.
- Q) I have a deadbolt lock on my door, can I still replace it with the Z-Wave automatic Door Lock?
 A) Yes, we offer both deadbolt and level style locks in three popular finishes.
- Q) I would like to have hard-wired Z-Wave light switches and power outlets, do you install those or simply provide the Z-Wave equipment?
 A) We are not licensed to work with high voltage power- you will need to hire a licensed electrician or DIY. We provide the equipment & will program your switches and/or outlets once installed to be interactive with your security system. **ALSO NOTE: Light switches in Deco Style with Single Pole, Three Way & Dimmer Options priced as shown, additional \$30 for special order 4-way switches. Toggle Switch Style- Limited Options.**
- Q) If I want to add cameras to my system and start with the basic Video Pro Plan for only \$5.00 per month, is there a limit to the number of cameras I can have?
 A) Yes, you are allowed EIGHT cameras with the basic Video Pro Plan.

No Phone?
... No Problem!

GSM CELLULAR COMMUNICATION STANDARD FEATURE

Installation, programming & testing of each peripheral device included!!

Each device has been given a point value— add your points and select your predesigned bundle lease or purchase package!

Add \$60 per point (due at contract signing) for custom designed systems greater than 24 points or calculating somewhere between the outlined bundle packages.
