

Personal Emergency Response Systems

WHY LIFESENTRY IS DIFFERENT?

TWO WAY VOICE FROM THE PENDANT- NOT THE BASE UNIT!

Unlike most systems on the market today, LifeSentry offers two way voice communication directly from the easy to wear pendant. Water Resistant and worn around the neck, on your wrist or on a belt clip, this system offers peace of mind both inside and outside of your home. Emergencies can happen anywhere in your home and even in the yard or driveway. Don't be limited with a system that will only allow communication when you are within "range" of your base unit.

With our purchase and lease options, we make it easy and affordable for everyone to have peace of mind.
